Section 0: Setting Up Claude Like a Pro

Skip this and every prompt below will give you generic output. Do this first and everything changes. Most people open Claude, type "write me a LinkedIn post," and wonder why it sounds like AI wrote it. The problem is not the prompts – it is that Claude knows nothing about you. This section shows you how to set up Claude's power features so every prompt produces output that sounds like you, targets your audience, and converts.

Claude Projects: Your LinkedIn Command Center

What it is: A persistent workspace where Claude remembers your context across every conversation. No more re-pasting your ICP, voice, and offer every time.

How to set it up:

1. Go to claude.ai > Projects (left sidebar)
2. Click "Create a Project"
3. Name it "LinkedIn Engine"
4. Click into Project Instructions (this is where the magic happens)

Paste this into Project Instructions:

IDENTITY

You are my LinkedIn ghostwriter. You have studied my writing for months. You write exactly like me – not like an AI assistant.

MY ICP

[Paste your ideal customer profile: role, company size, industry, pain points, budget]

MY OFFER

[What you sell, who you sell it to, and the outcome you deliver]

MY POSITIONING

[What makes you different from everyone else in your niche]

MY VOICE RULES

[Paste your Voice DNA Profile – use Prompt 6 in this document to create one]

NEVER DO

- Never use words like "leverage," "utilize," "innovative," "passionate," or "thought leader"
- Never write sentences longer than 15 words unless it's a story
- Never start a post with "I" or "As a..."
- Never use more than 1 emoji per post
- Never write in a corporate or academic tone

QUALITY CHECK

Before outputting any content, verify:

1. Would my ICP stop scrolling for this?
2. Does this sound like me or like an AI?
3. Is there a specific, actionable takeaway?

Now every conversation in this Project automatically knows your voice, your audience, and your positioning. No re-pasting. No re-explaining. Just results.

Claude Skills: Your Permanent Voice Engine

What it is: Skills are saved instruction sets that Claude applies to every conversation in a Project. Think of it as giving Claude permanent memory of who you are and how you write.

Without a Skill: "Write a LinkedIn post about cold outbound" = generic AI content

With a Skill: "Write a LinkedIn post about cold outbound" = content in YOUR voice, targeting YOUR ICP, with YOUR

frameworks

Use Prompt 7 (The Claude Voice Skill Builder) in this document to create your Skill. It takes your Voice DNA Profile, your ICP, and your positioning, then outputs the full Project Instructions. The Skill turns Claude into a ghostwriter who has studied you for months. The more context you add to the Project (top posts, ICP docs, brand guidelines), the better it gets.

Extended Thinking: Deep Strategy Mode

When enabled, Claude thinks through your problem step-by-step before responding. The output quality for strategic work jumps dramatically.

When to use it: ICP research, positioning, profile audits, lead magnet strategy, content-to-offer alignment analysis.

When NOT to use it: Writing LinkedIn posts (overkill), generating hooks or templates, quick content expansions, DM template creation.

How to turn it on: Toggle "Extended thinking" in conversation settings. Prompts 16-20 benefit most from it.

Artifacts: Your Reusable Template Factory

When Claude generates something substantial – a hook library, content calendar, DM template set, or lead magnet outline – it creates an Artifact. Artifacts are saved outputs you can reference, edit, and reuse across conversations.

Build a library over time:

Hook Library – Add to it weekly. After a month, you will have 100+ hooks organized by emotion and archetype.

Content Calendar – Generate monthly, iterate weekly.

DM Template Bank – Save every high-performing message. Rotate quarterly.

Voice DNA Profile – Your living document that gets more accurate over time.

Web Search: Real-Time Intelligence

Claude can search the web in real time, turning it from a static knowledge base into a live research assistant.

"Search for what [competitor] posted this week about [topic]" = competitive intelligence

"Find the latest news in [your industry] and suggest 3 LinkedIn post angles" = timely content

"Research [prospect's company] and give me 3 things I can reference in a DM" = personalized outreach

Phase 1: Profile That Converts

Your profile is not a resume. It is a landing page. These prompts turn it into one.

1. The Full Profile Audit

Goal: Score your LinkedIn profile across 8 dimensions and get specific fixes for every section that is leaking leads.

Input: Your full LinkedIn profile (headline, About, Featured, Experience, Activity)

Prompt 1: Full Profile Audit

You are a LinkedIn profile conversion specialist who has audited 500+ profiles for B2B founders and consultants.

Audit my LinkedIn profile across these 8 dimensions. For each, give me a score out of 10, explain why, and provide the specific fix.

1. Profile Photo and Banner – Does the photo look professional and approachable? Does the banner reinforce my positioning?
2. Headline – Does it pass the 3-second test: What do I do? Who do I help? What outcome do I deliver?
3. About Section – Does it open with a hook? Does it speak to ICP pain first? Does it include proof? Does it end with a CTA?
4. Featured Section – Am I using it? Does it showcase my best lead magnet or social proof?
5. Experience Section – Does my current role read like a sales page or a resume?
6. Activity/Content – Am I posting at least 3x per week? Are posts relevant to my ICP?
7. Premium and Creator Mode – Are the right features enabled?
8. The 5-Second Test – If my ICP lands on my profile for 5 seconds, can they answer: What does this person do? Is this relevant? What should I do next?

Overall Score: ___/80

– 60+: Ready to convert

– 40–59: Needs optimization

– Below 40: Actively losing leads

My profile: [PASTE YOUR FULL PROFILE]

My ICP: [DESCRIBE]

My offer: [YOUR OFFER]

2. The ICP Landing Page Test

Goal: Simulate your ideal customer visiting your profile and diagnose exactly where they would drop off.

Prompt 2: ICP Landing Page Test

You are my ideal customer: [DESCRIBE YOUR ICP IN DETAIL – role, company size, industry, pain points, budget].

You just saw one of my LinkedIn posts and clicked on my profile. Walk me through your experience as if you are narrating your thought process in real time:

First 2 seconds: What do you notice? What is your gut reaction?

Next 5 seconds: Do you understand what I do? Is it relevant to you?

The scroll: You read my About section. Do you keep reading or bounce? Why?

Featured section: Do you click on anything? What catches your eye – or does not?

Recent activity: Do my posts make you think "this person gets it"?

The decision: Do you follow, connect, DM, or leave? Why?

Rate your experience:

- Clarity: ___/10

- Relevance to your needs: ___/10

- Trust/credibility: ___/10

- Likelihood to take action: ___/10

Then tell me: What one change would make you most likely to book a call?

My profile: [PASTE PROFILE]

3. The Headline Laboratory

Goal: Generate 10 headline variations using proven formats, scored for your specific ICP.

Prompt 3: Headline Laboratory

You are a LinkedIn headline copywriter who has tested 1,000+ headlines.

My current headline: [PASTE]

My ICP: [DESCRIBE]

My offer: [DESCRIBE]

Generate 10 headline variations using these formats:

1. Outcome-first: "I help [ICP] achieve [outcome]"
2. Result + method: "[Result] using [method]"
3. Problem-solver: "Fixing [problem] for [ICP]"
4. Authority + niche: "[Title] | [Expertise] for [audience]"
5. Proof-led: "[Metric] | [What you do]"
6. Question: "[Question your ICP is asking]?"
7. Contrarian: "The [ICP] who [does opposite] | [Role]"
8. Mission-driven: "On a mission to [goal] | [Method]"
9. Client-voice: "My clients call me their [description]"
10. Social proof: "[Award/metric] | [What you do]"

For each, rate: Clarity (1-10), Curiosity (1-10), Trust (1-10).

Recommend the top 3 and explain why.

4. The About Section Rewriter

Goal: Rewrite your About section using a conversion-optimized structure.

Prompt 4: About Section Rewriter

You are a conversion copywriter specializing in LinkedIn About sections.

Rewrite my About section using this structure:

- Lines 1-2: Hook - A bold opening. Not "I am a..." but a provocative statement, a specific result, or a question.
- Lines 3-5: Problem - Name the exact pain your ICP is experiencing. Use THEIR language.
- Lines 6-8: Authority - Why should they listen? Specific results, experience, proof.
- Lines 9-11: What you do - One sentence for what. One for who. One for the outcome.
- Lines 12-13: Proof - One or two specific results.
- Line 14: CTA - "Book a free strategy call" or "DM me [KEYWORD] for [ASSET]."

Rules: Short paragraphs (2-3 lines max). No buzzwords. Every line earns the next line. 8th grade reading level.

My current About: [PASTE]

My ICP: [DESCRIBE]

My offer: [DESCRIBE]

My best results: [LIST 3-5]

5. The Featured Section Architect

Goal: Design your Featured section as a conversion-optimized storefront.

Prompt 5: Featured Section Architect

You are a LinkedIn Featured section strategist.

My Featured section should function like a storefront. Recommend the ideal 4-item layout:

Slot 1 (Lead Magnet): What free resource would my ICP find irresistible? Title, format, 2-line description.

Slot 2 (Social Proof): What type of proof is most compelling? Case study, testimonial, results screenshot, media feature.

Slot 3 (Authority Content): What positions me as the obvious expert?

Slot 4 (CTA): What direct CTA converts the warmest visitors?

For each: exact title, why it belongs in this position, what it signals to my ICP.

My ICP: [DESCRIBE]

My offer: [DESCRIBE]

My best content/results: [LIST]

Phase 2: Content Engine

Stop writing posts from scratch. Build a system that generates content that attracts your ICP on repeat.

6. The Voice Autopsy

Goal: Deconstruct your writing voice into specific, replicable characteristics so Claude can match it perfectly.

Input: 5-10 of your best LinkedIn posts

Claude Skill tip: The output of this prompt becomes the foundation of your Claude Skill. Save it.

Prompt 6: Voice Autopsy

You are a linguistic analyst specializing in personal brand voice identification.

Analyze these LinkedIn posts and extract my unique voice DNA. Be hyper-specific – not generic labels like "professional" or "conversational." I need the actual fingerprint of my writing.

Extract:

- Sentence structure: Average length, fragment frequency, question usage, short-to-long ratio.
- Word choice: 10 most frequent words/phrases, words I NEVER use, vocabulary level, jargon patterns.
- Rhythm and flow: Transitions, list usage, opening patterns, closing patterns.
- Emotional signature: Emotions triggered, confrontational vs. empathetic vs. analytical, teaching vs. storytelling vs. opinion ratio.
- Formatting patterns: Line breaks, bold/italic, emoji usage, post length distribution.

Output as a "Voice DNA Profile" I can paste into my Claude Project Instructions.

My posts: [PASTE 5-10 POSTS]

7. The Claude Voice Skill Builder

Goal: Create permanent Claude Project Instructions that encode your voice. Paste once, write in your voice forever.

This is the most important prompt in the entire document. It turns Claude into your permanent ghostwriter.

Prompt 7: Claude Voice Skill Builder

You are a Claude power user and prompt engineer.

Using my Voice DNA Profile below, create the full Project Instructions I should paste into a Claude Project called "LinkedIn Engine."

Structure:

IDENTITY - You are my LinkedIn ghostwriter. You have studied my writing for months.

VOICE RULES - [10 most important rules for matching my voice]

NEVER DO - [Anti-voice rules - things that make it sound like AI]

EXAMPLE WRITING - [5 examples of my actual posts]

FORMAT RULES - [Line breaks, bold, emoji, structure patterns]

CONTENT CONTEXT - [My ICP, offer, positioning]

QUALITY CHECK - [3 self-checks before outputting any content]

Voice DNA Profile: [PASTE FROM PROMPT 6]

My ICP: [DESCRIBE]

My offer: [DESCRIBE]

My positioning: [WHAT MAKES YOU DIFFERENT]

After you run this: Go to [claude.ai](#) > Projects > Your "LinkedIn Engine" project > Paste the output into Project Instructions. Done.

8. The Hook Generator

Goal: Generate scroll-stopping hooks using 6 emotions that drive engagement and 9 proven archetypes.

Prompt 8: Hook Generator

You are a LinkedIn hook specialist.

The 6 scroll-stopping emotions:

1. Fear of missing out - "Everyone knows this except you"
2. Righteous anger - "This industry practice is broken"
3. Aspirational curiosity - "Here is how the top 1% do it"
4. Pattern interruption - "Everything you have been told about X is wrong"
5. Identity validation - "If you are feeling X, you are not alone"
6. Urgent self-interest - "This will save/cost you \$X"

The 9 hook archetypes: Contrarian take, Social proof, Curiosity gap, Pain-first, Relatable truth, Story opener, Data lead, Confession, Direct challenge.

Generate 20 hooks for my niche. For each:

- The hook (2 lines max)
- Which emotion it triggers
- Which archetype it uses
- Why it would stop MY ICP from scrolling

My niche: [DESCRIBE]

My ICP: [DESCRIBE]

My best-performing hooks: [PASTE 3-5]

9. The Content Angle Generator

Goal: Generate a month of content with a strategic mix that prevents audience fatigue.

Prompt 9: Content Angle Generator

You are a LinkedIn content strategist.

Generate 30 content ideas for the next 30 days. Each should include:

- Hook (first 2 lines)
- Angle (what makes this specific)
- Format (story, listicle, contrarian, case study, how-to, BTS)
- CTA (what action do I want?)
- ICP relevance (why would my buyer care?)

Strategic mix:

- 6 contrarian takes
- 5 case studies / results posts
- 5 how-to / tactical posts
- 4 behind-the-scenes
- 4 story-driven posts
- 3 engagement bait (polls, "comment X for Y")
- 3 industry commentary

My niche: [DESCRIBE]

My ICP: [DESCRIBE]

My offer: [DESCRIBE]

10. The Post Expansion Engine

Goal: Take a content idea and expand it into a publish-ready LinkedIn post in your voice.

Prompt 10: Post Expansion Engine

You are my LinkedIn ghostwriter with my Voice DNA Profile loaded.

Take this idea and expand it into a full LinkedIn post:

Idea: [PASTE YOUR IDEA OR ROUGH DRAFT]

Structure:

1. Hook (first 2 lines – determines if anyone reads)
2. Setup (3–4 lines – context or story opening)
3. Body (insights, steps, data, examples)
4. Pivot (the realization, the turn)
5. CTA (what should they do next?)

Rules: One idea per line. Short paragraphs. No hashtags. No emojis in body. 150–250 words. Match my voice DNA.

Voice DNA Profile: [PASTE OR REFERENCE PROJECT]

Phase 3: Lead Generation Machine

Content attracts attention. These prompts convert it into pipeline.

11. The Lead Magnet Builder

Goal: Build a complete, audience-tested lead magnet in one Claude session.

Tip: Use extended thinking for this one – it needs deep reasoning about your ICP.

Prompt 11: Lead Magnet Builder

You are a lead magnet architect who has built high-converting lead magnets for top creators.

Build me a lead magnet:

Step 1: Pain Excavation – Top 5 ICP pains ranked by urgency and solvability.

Step 2: Format Selection – Checklist, playbook, template library, cheat sheet, calculator, or audit tool? Why?

Step 3: Title Generation – 10 titles that pass the "\$47 test" (would someone consider paying \$47 based on the title alone?). Score each on perceived value (1-10).

Step 4: Outline – Full outline with section headers, descriptions, estimated word count.

Step 5: Audience Validation – "Who is this most relevant for?" If the answer does not match my ICP, flag what to change.

My ICP: [DESCRIBE]

My offer: [DESCRIBE]

My expertise: [WHAT DO YOU KNOW THAT OTHERS DON'T?]

12. The Comment-to-Pipeline Strategy

Goal: Build a commenting system that warms prospects before you ever DM them.

Prompt 12: Comment-to-Pipeline

You are a LinkedIn engagement strategist who uses strategic commenting as a lead gen channel.

Build my commenting strategy:

Target List: Types of creators and posts I should comment on.

Comment Arsenal: 5 templates for each angle:

1. Contrarian - Respectfully challenge the premise
2. Data drop - Add a stat or insight that extends the conversation
3. Story bomb - Brief relevant anecdote
4. Provocative question - Makes the author and readers think
5. Snarky agreement - Agree with humor and personality

Each: 2-4 sentences, ends inviting a reply.

14-Day Warm-Up Sequence: How many comments/day, on whose posts, building toward a natural DM.

My niche: [DESCRIBE]

My ICP: [DESCRIBE]

13. The DM Funnel Builder

Goal: Complete DM sequence from stranger to booked call - without being salesy.

Prompt 13: DM Funnel Builder

You are a LinkedIn DM strategist who has helped book thousands of sales calls.

Build my complete DM funnel:

Step 1: Content Bait – 3 post topics designed to trigger engagement from my ICP.

Step 2: Signal Detection – Checklist of warm signals (profile views, engagement, connection requests).

Step 3: Initial DM – "Hey, thanks for [what they did]. Did you see my post about [topic]? What did you think?"

Step 4: Opinion Exchange (3 rounds) – Follow-up questions. No pitch. Just conversation.

Step 5: Client Twin Transition – "Hey [NAME], I just realized you are similar to my client who had a [TYPE OF BUSINESS]. I helped them get [OUTCOME] in [TIME]. I have got a doc that breaks it down. Want it?"

Step 6: Interest Check – "And btw – is this something you are looking for help with?"

Step 7: Qualification (One at a Time) – Ask about timing, importance, needs.

Step 8: Bridge to Call – "From what you have mentioned I might be able to help. Free for 10 minutes [DAY] at [TIME 1] or [TIME 2]?" Always give two specific time options.

Step 9: Confirmation Lock – Calendar invite + text.

Customize for: My offer: [YOUR OFFER] | My ICP: [DESCRIBE] | My best results: [LIST 2-3]

14. The Follow-Up Sequence

Goal: Re-engage prospects who went silent – without being annoying.

Prompt 14: Follow-Up Sequence

You are a LinkedIn DM follow-up specialist.

Rules: NEVER say "just following up." Max 2 follow-ups after initial. Each adds value.

Follow-up 1 (2-3 days later): Short, casual. "Hey [NAME], would you like me to send the resource?"

Follow-up 2 (3-5 days later): The "easy out." "Hey [NAME], no problem if not interested. Just let me know."

Why it works: People respect when you do not chase. Many respond "sorry, been busy – yes, send it."

Reality: 79% of booked calls come after 40+ messages over weeks. If you quit after 3, you are stopping right before it works. But those 40+ messages should be valuable conversation, not "checking in."

Generate 5 variations of each for:

My offer: [YOUR OFFER] | My ICP: [DESCRIBE]

15. The Gift-First DM System

Goal: Cold outreach through pure value – no pitch, no ask – converting through generosity.

Prompt 15: Gift-First DM System

You are a LinkedIn DM strategist specializing in value-first outreach.

Build my "Gift First" sequences:

The Loom Audit DM: "Hey [NAME], I recorded a quick 5-min audit of [their profile/website/funnel]. Found 3 things that might be costing you [leads/revenue]. No pitch – just thought it might help. Want me to send it?"

The Resource Drop: "Hey [NAME], I put together a [resource] on [topic]. Thought of you because of your post about [SPECIFIC POST]. Want it?"

The Introduction Offer: "Hey [NAME], I noticed you are working on [X]. I know someone who just solved that exact problem – want me to intro you?"

Generate 3 variations of each. For Loom Audit, list 5 specific things I could audit for my ICP.

My ICP: [DESCRIBE]

My expertise: [DESCRIBE]

Phase 4: Positioning and Strategy

The prompts that make everything else work 10x better. Use extended thinking for all of these.

16. The ICP Deep Dive

Goal: Build a comprehensive ICP profile.

Setup: Turn on extended thinking.

Prompt 16: ICP Deep Dive

You are a market research analyst specializing in B2B buyer psychology.

Build my comprehensive ICP:

Demographics: Job titles, company size, revenue range, industry, geography.

Psychographics: Top 5 fears, top 5 desires, top 5 failed solutions, what makes them say "shut up and take my money."

Behavioral Signals: What they search on LinkedIn, content they engage with, who they follow, what triggers action.

Language Map: How THEY describe their problems (their words, not yours), jargon they use, trust phrases vs. skepticism phrases.

My business: [DESCRIBE]

My offer: [DESCRIBE]

My current clients: [DESCRIBE 3-5 BEST CLIENTS]

17. The Positioning Statement Generator

Goal: A positioning statement that makes your ICP immediately understand why you are different.

Prompt 17: Positioning Statement Generator

You are a brand positioning strategist.

Generate 5 positioning statements:

For [ICP] who [core problem] I provide [solution] that [primary outcome] unlike [alternatives] my approach [differentiator]

5 variations: aggressive to measured. Score each on Clarity, Differentiation, Desirability (1-10). Pick the winner.

My business: [DESCRIBE]

My ICP: [DESCRIBE]

My competitors: [WHO DO THEY CHOOSE INSTEAD?]

My unfair advantage: [WHAT CAN YOU DO THAT OTHERS CAN'T?]

18. The Niche Messaging Matrix

Goal: Segment-specific messaging because a founder and a VP have different pains.

Prompt 18: Niche Messaging Matrix

You are a messaging strategist.

Create a messaging matrix for 3-5 ICP segments: [LIST YOUR SEGMENTS]

For each segment, cover: Primary pain, Language they use, What they have tried, Dream outcome, Biggest objection, Best hook angle, Proof they would find credible, CTA that converts.

Then write a sample hook and About section opener for each segment.

19. The Content-to-Offer Alignment Audit

Goal: Check whether your content attracts buyers or just followers.

Prompt 19: Content-to-Offer Audit

You are a content-to-revenue strategist.

For each post I provide:

1. Who does this attract? (Job title, company size, intent level)
2. Does that match my ICP? (Yes/No + why)
3. Buyer intent score (1-10): Would someone who engages eventually buy?
4. The fix: How to reframe the same idea to attract buyers.

Red flags: High engagement but wrong audience. Teaching your ICP's ICP. Positioning as peer not expert. Too broad.

My offer: [DESCRIBE]

My ICP: [DESCRIBE]

My recent posts: [PASTE 5-10]

20. The Competitive Positioning Scanner

Goal: Find the white space your competitors are not occupying.

Prompt 20: Competitive Scanner

You are a competitive intelligence analyst for LinkedIn personal brands.

The Players: Archetypes competing for my ICP's attention.

The Messaging Landscape: What does everyone say? What is overused? What is commoditized?

The White Space: What angles is NOBODY taking?

My Positioning Opportunity: Given my background, results, and approach – what specific angle should I own that is true, different, and valued?

My niche: [DESCRIBE]

My background: [WHAT MAKES YOU UNIQUE]

My results: [BEST METRICS]

My ICP: [DESCRIBE]

Part 2: 100 Claude LinkedIn Tips

25 Profile Optimization Tips

1. Your headline has 220 characters.

Use all of them. Format: [What you do] | [Who you help] | [Proof] | [CTA].

2. Your banner is a billboard.

Add your value proposition, a CTA, and social proof. Do not leave it as default LinkedIn blue.

3. "Open to work" frames repel B2B clients.

If you are selling services, remove it.

4. Your About section should open with a hook, not "I am a..."

The first 2 lines show in the preview. If they are boring, nobody clicks "see more."

5. Use Claude to audit your profile.

Paste every section and ask: "If my ideal customer landed here for 5 seconds, would they know what I do, trust me, and know what to do next?"

6. Featured section = storefront.

Lead magnet first, social proof second, authority content third, calendar link fourth.

7. Your Experience section is not a resume.

Rewrite your current role to read like a landing page: what you do, who for, what results.

8. Add media to every Experience entry.

Case studies, testimonials, presentations – anything that proves the claims.

9. Invest \$100 in a headshot.

Highest-ROI investment on LinkedIn. Not a vacation photo. Not a selfie.

10. Use Claude to write your headline.

Prompt: "10 LinkedIn headlines for someone who [offer] for [ICP]. Each passes the 3-second test."

11. Turn on Creator Mode.

Changes "Connect" to "Follow" – grows your audience faster. Pick 5 relevant topics.

12. Pin your best post.

Three dots > "Pin to top of profile." New visitors see it first.

13. Your location matters.

If you serve a specific market, make sure location reflects that. People filter by location.

14. Add your calendar link to Contact Info.

Edit profile > Contact Info > Website. Label: "Book a call."

15. Use the pronunciation feature.

10 seconds of your voice builds instant trust: "Hey, I am [name], I help [ICP] with [outcome]. Let's connect."

16. Clean up your profile URL.

linkedin.com/in/yourname – not linkedin.com/in/yourname-a7b8c9d0.

17. Simulate an ICP visiting your profile.

Claude prompt: "You are [my ICP]. Walk through my profile and tell me where you would bounce."

18. Sprinkle CTAs throughout your About section.

Not just at the end – every 3–4 lines.

19. Use Featured to gate content.

Link to Notion pages, lead magnets, free tools. Every click from Featured is a warm lead.

20. Review your profile on mobile.

60%+ of LinkedIn traffic is mobile. If your banner text is unreadable, fix it.

21. Get endorsements for your top 3 skills.

Small thing, adds credibility signals.

22. Your name field allows 20 characters per field.

Some add a descriptor: "Ariel | Voice AI." Test whether it looks spammy.

23. Turn off "People also viewed."

Settings > Visibility. Stop showing competitors on your profile.

24. Update your profile every 2 weeks.

LinkedIn favors recently-updated profiles in search.

25. Rewrite your entire profile as a system.

Do not optimize in isolation. Paste everything into Claude: "Rewrite so every section reinforces: I help [ICP] achieve [outcome] through [method]."

25 Content Strategy Tips

1. Post between 7-9 AM in your ICP's time zone.

LinkedIn's algorithm weights early engagement more.

2. The hook determines everything.

80% of performance is the first 2 lines. Spend more time on the hook than the body.

3. One idea per post.

Not three insights. One. Go deep.

4. Write at an 8th grade level.

Simple writing performs better. Claude prompt: "Simplify to 8th grade without losing the insight."

5. Short paragraphs only.

1-3 lines max. LinkedIn is a scrolling platform.

6. Use "you" more than "I."

Reader-focused posts outperform self-focused ones. Ratio: 2:1 minimum.

7. The engagement window is 90 minutes.

Reply to every comment in the first 90 minutes. Signals conversation to the algorithm.

8. Do not use hashtags.

They do not help anymore. At best neutral, at worst they limit reach.

9. Comment on 10-15 posts before publishing yours.

Pre-loads your name in feeds. When your post drops, they already recognize you.

10. Use Claude for angles, not final posts.

Ask for 20 angles, pick the best 3, then write or expand.

11. Contrarian takes outperform educational content 3-5x.

People engage with disagreement.

12. End every post with a specific question.

Not "What do you think?" - "What is the one tactic that actually moved the needle for your outbound?"

13. Use "Comment [KEYWORD] for [RESOURCE]."

Highest-converting CTA format. Drives comments (boosting reach) and captures leads.

14. Repurpose one post into five formats.

Claude prompt: "Turn this into a carousel, poll, story, contrarian reframe, and listicle."

15. Study when your audience is online.

LinkedIn analytics shows follower activity windows.

16. Personal stories outperform tactics 2:1.

"I failed at X" beats "5 steps to X."

17. Stress-test before publishing.

Claude prompt: "Read this as my ICP. Would you stop scrolling? Read to end? Comment? Be brutal."

18. Carousels get the most reach.

Keeps people on-platform longer = algorithm reward.

19. Do not edit within the first hour.

Editing resets the algorithm.

20. Build a content bank in your Claude Project.

Every idea – client question, random insight, competitor mistake – paste it in. When it is time to write, you have 50+ ideas waiting.

21. Use Claude's web search for timely angles.

"Search for this week's news in [industry]. Suggest 3 LinkedIn post angles."

22. Post 4–5 times per week minimum.

3x is the floor. 5x is where compounding kicks in.

23. Test different post lengths.

Short (50–100 words) for hot takes. Medium (150–250) for frameworks. Long (300–500) for stories.

24. Run a voice consistency check.

Claude prompt: "Compare this to my Voice DNA. Flag anything that does not sound like me."

25. Never post without a CTA.

Even "Follow for more." Every post should tell readers what to do next.

25 Lead Generation Tips

1. Lead magnet title > content.

If the title does not pass the "\$47 test," it will not get downloaded.

2. Gate your best content, not average content.

The best lead magnet promises the most specific outcome, not the most pages.

3. Build lead magnets in one Claude session.

A week's work in an afternoon.

4. "Comment + DM" is the highest-volume lead capture on LinkedIn.

Post says "Comment KEYWORD." Automation sends the DM.

5. Put CTAs inside your lead magnet.

Top, middle, and end. People who download are warm leads.

6. Validate before publishing.

Claude prompt: "Who is this most relevant for?" If the answer is not your ICP, adjust.

7. DMs convert better than landing pages on LinkedIn.

A personal DM gets opened. A landing page link gets bookmarked and forgotten.

8. Never cold DM with a pitch.

First DM is always value or a question. Pitch comes after 3-5 replies.

9. Use Claude for DM sequences.

"Write a 5-step sequence moving [ICP] from stranger to booked call. Each step adds value, not pitch."

10. Comment strategy = free lead gen.

Strategic comments put your name in front of buyers without posting.

11. Track your lead sources.

"How did you find me?" Double down on what works.

12. Use LinkedIn search to find ICPs.

Filter by title, company size, industry. Engage for 2 weeks before DMing.

13. Build a "lead magnet machine" in Claude Projects.

One Project with your ICP and voice. Generate a new resource every 30 minutes.

14. Reposters are your hottest leads.

They are telling their network you are worth following. Treat them as VIPs.

15. Automate comment-triggered DMs.

Manual does not scale. Lead Shark or similar – send the resource within minutes.

16. Create lead magnets for different awareness stages.

Problem-aware: "how to fix X." Solution-aware: "which tool for X." Product-aware: "why you over Y."

17. Analyze which posts generate leads, not just likes.

Claude prompt: "Which of these posts attracted the highest-intent audience?"

18. LinkedIn Events are underrated.

Free workshops, AMAs, live audits. LinkedIn pushes Events hard in the algorithm.

19. Connection requests with notes convert 30%+ higher.

2-3 sentences referencing their content. Claude can personalize at scale.

20. Build a "teasing content" engine.

3-5 posts teasing the topic before the lead magnet drop. Audience is primed and waiting.

21. Loom audit method for high-value prospects.

Record 3-5 minutes auditing their profile or funnel. DM with zero pitch. Converts at absurd rates.

22. Every DM should end with a question.

Questions invite replies > conversation > trust > calls.

23. Use Claude to qualify leads before calls.

"Based on this DM conversation, score them on budget, authority, need, timeline."

24. Share client results publicly (with permission).

"My client went from [before] to [after] in [timeframe]" generates inbound faster than anything.

25. The best lead gen tip: make your ICP feel seen.

Not smart. Not impressed. SEEN. When someone reads your post and thinks "this person gets me," they DM you.

25 Claude Best Practices

1. Use Claude Opus 4.6 for LinkedIn.

More natural writing, deeper reasoning. The quality difference over other models is noticeable.

2. Set up a Claude Project first.

Projects > Create > "LinkedIn Engine" > Paste your voice, ICP, offer into Project Instructions. This is step zero.

3. Extended thinking for strategy, not content.

On for ICP research, positioning, audits. Off for post writing and templates.

4. Artifacts are reusable.

Do not regenerate - iterate. Your hook library, content calendar, and DM templates should live as Artifacts you build over time.

5. Context > prompts.

A mediocre prompt with great context beats a perfect prompt with none. Front-load your context.

6. Do not say "write a LinkedIn post."

Say "expand this idea using my Voice DNA Profile." First gives generic AI. Second gives your voice.

7. Use web search for real-time intel.

"What did [competitor] post about [topic] this week?" - competitive intelligence on demand.

8. Upload multiple documents to your Project.

Top posts, ICP doc, lead magnet outlines, brand guidelines - Claude references all of them automatically.

9. Chain your prompts.

Idea > Hook > Body > Voice-check. Four steps beats one mega-prompt every time.

10. Batch content in one session.

"Generate 10 hooks on [topic]. Expand top 3 into posts. Create 5 variations of the best one." One session, five posts.

11. Save your best prompts.

Build a personal prompt library. Better yet, save them in your Claude Project as reference documents.

12. Use Claude as editor, not just writer.

"Do not rewrite - improve. Fix weak spots, sharpen the hook, flag generic language. Keep my voice."

13. Claude remembers everything in a conversation.

Context from the start stays loaded. Reference "the ICP from earlier" and it works.

14. Create SOPs with Claude.

"Based on my strategy, create a detailed SOP for weekly content creation. Include steps, tools, timing, templates."

15. Do not settle for first output.

"This is good. Now make it great." Second or third iteration is almost always better.

16. Reverse-engineer competitor content.

"Analyze these 5 posts from my niche. What patterns, hooks, CTAs work? What could I do differently?"

17. Claude can roleplay as your ICP.

"You are [my ICP]. I am going to pitch you. Tell me objections and what would make you say yes." Free market research.

18. Build your hook library over time.

Every great hook Claude generates > add to your Artifact. After a month: 100+ hooks. Never stare at a blank screen again.

19. Use Claude for email sequences.

"5-email nurture sequence for someone who downloaded [lead magnet]. Build trust, lead to call booking."

20. Score your content before publishing.

"Score this: hook strength, value density, ICP relevance, CTA clarity, voice consistency. 1-10 each. How to improve the lowest."

21. Prep for sales calls with Claude.

"My next call is with [description]. Based on my ICP profile, what are their likely pains, objections, hot buttons?"

22. Export Artifacts to Notion.

Content calendars, lead magnets, template libraries – copy directly from Artifact to Notion, Google Docs, or any markdown tool.

23. A/B test with Claude.

"Two versions of my headline: Version A (outcome-focused), Version B (proof-focused). Predict which ICP segment responds better."

24. Projects persist. Conversations do not.

Without a Project, every new chat starts from zero. With a Project, your context lives forever. Non-negotiable.

25. Claude is not a content printer – it is a thinking partner.

Use it to stress-test strategy, challenge assumptions, validate positioning, find blind spots. The founders who treat it as a strategist outperform the ones who treat it as a writing tool.

Final Thought

Every founder on LinkedIn is competing for the same attention. Most are doing it manually – writing posts from scratch, guessing what works, sending cold DMs into the void.

You now have 20 system-level prompts and 100 tactics running on the most powerful AI tool available. The gap between you and everyone else is not effort. It is infrastructure.

Build the system. Run the prompts. Let Claude handle the heavy lifting while you focus on closing.
