

How to Grow Your First 10K Followers on LinkedIn

Key Learnings from Josh Sanders' Masterclass

Head of Content @ Chris Donnelly
Co-Founder @ The Creator Accelerator

01 | Your Profile = Landing Page

Optimize Your Profile Like a Pro

The Foundation

- Your profile is your landing page, treat it like one
- Headline must answer: "Who do you help?"
- Optimize for LinkedIn search with keywords
- Banner image should reflect your personal brand
- About section must convert readers into followers

People decide to follow you within 3 seconds of landing on your profile.

02 | The 5-Part Post Framework

Structure Every Post for Maximum Impact

1

The Hook (First Line)

Earns attention instantly. Your first line either stops someone or it doesn't.

2

The Setup

A scenario your ICP actually relates to. Make them nod their head.

3

The Insight

The core value. Share something new, counterintuitive, or practical.

4

The Transformation

What changes if they act on your insight? Paint the picture.

5

The CTA

Clear call to action. Never use "curious to hear thoughts?"

03 | Hook Mastery

Your First Line Is Everything

Most LinkedIn posts die after the first line. Not because the idea is bad, but because there is no structure.

"I posted one LinkedIn post and gained 8-10K new followers."

"Stop doing [common mistake]. Here is what actually works..."

"The biggest LinkedIn growth hack? It is not posting more."

"I helped grow a page from 0 to 3M+ followers. Here is the playbook."

The first line either stops the scroll or it doesn't. Make it count.

04 | Engagement > Posting

Comments Are the Secret Weapon

Most people post more and hope. Josh barely talks about posting. He talks about comments.

Comment Strategically

Leave thoughtful comments on posts from your ICP and industry leaders daily.

Build Real Relationships

Comments build connections faster than posts. Be genuine, add value every time.

Make Friends in Your Niche

Focus on making friends, not just followers. Relationships compound over time.

Engage Before You Post

Spend 15-20 minutes engaging before you publish. It warms up the algorithm.

05 | Don't Chase, Attract

Build a Magnetic Personal Brand

Inbound converts far better than outbound. Attract your dream clients through valuable content.

Chasing (Wrong)

- Cold DMs to strangers
- Begging for follows
- Spamming sales links
- Focusing on vanity metrics

Attracting (Right)

- Sharing valuable insights
- Building real relationships
- Creating content that serves
- Focusing on impact and fun

Stop chasing followers. Focus on: making friends, doing sales, making impact, having fun.

06 | Newsletter Power

The Compounding Growth Machine

0 to 250K+

Newsletter subscribers in just 2 years

Own Your Audience

A newsletter is an asset you own. LinkedIn can change the algorithm, but your list is yours forever.

Compounding Effect

Every subscriber is a touchpoint. Newsletters multiply your reach and deepen relationships over time.

Content to Conversion

Use your LinkedIn content to drive newsletter signups. Then nurture with exclusive insights.

07 | Speed Wins

Post Early, Keep It Simple

Moving early usually beats waiting for consensus. LinkedIn rewards those who show up consistently.

One Post, 10K Followers

Josh posted early and kept it simple. One well-timed post brought in 8-10K new followers.

Consistency Over Perfection

LinkedIn rewards time. Show up daily. Your 50th post will be 10x better than your first.

Data-Driven Decisions

Review what works. Double down on formats and topics that get engagement. Cut what doesn't.

Don't wait until your content is perfect. Perfect is the enemy of posted.

08 | Views to Revenue

Monetize Your LinkedIn Audience
